AUGER TORQUE EUROPE LTD

## A Customer-Driven Global Company

Established in Europe in 1998, Auger Torque has created a new standard in the Earth Drill and Trencher Attachment market by putting you, the customer, at the centre of everything we do.

In 2005, after surveying the market carefully, we released a new range of innovative products, designed to provide unrivalled reliability and cost effective operation.

Auger Torque is proud to have become part of the Kinshofer Group of companies in 2015. With the backing of the German attachments giant Auger Torque has since enjoyed even greater growth in all areas of its business operations.

Auger Torque's five manufacturing bases around the globe are busy satisfying the ever-growing demand for high-quality products in over seventy countries and on all seven continents.
Auger Torque - A manufacturing company with Global distribution and dealer networks.

AUGER SUMMARY
Full technical details of Augers, Extensions and Wear Parts can be found in the Auger section of this brochure.

## S6 AUGERS

Auger Torque S6 Augers feature extra long flighted
sections of shallow pitch flights. Earth, Tungsten and
Rock variations are available.
Available in the following diameters:

EXCAVATORS \& BACKHOES FROM 8-22 T

STANDARD HUB OPTION

SHGCK LOCK"
Tooth Locking System
DON'T LEAVE YOUR TEETH DOWN THE HOLE!

With our patented Shock Lock ${ }^{\text {TM }}$ Tooth Locking System tooth loss is now a thing of the past. Using the Shock Lock ${ }^{\text {TM }}$ pin and rubber insert in our unique Shock Lock ${ }^{\text {TM }}$ tooth holders ensures your Auger teeth are safely locked in place and protected against shock fractures.

Replacing worn teeth is a breeze with this system, simply knock out the old pin with a standard hole punch and the tooth will slide out of the holder with ease. Acclaimed as the best system on the market you will never need to worry about fitting spare teeth due to loss again.

Earth Drill 15 000MAX
Earth Drill $\mathbf{2 0} 000 \mathrm{MAX}$
Earth Drill $\mathbf{2 5 0 0 0 M A X}$

WEAR PARTS FOR GROUND CONDITIONS

Best used in dry, hard or medium ground conditions where floating rocks may be encountered. The perfect all-rounder if you are not sure about what you might encounter.

ROCK (Taper Lock)
For very hard ground and tarmac where extra cutting is needed and high wear is expected. Most effective on machines with high down pressure.

## Alignment Monitor

## Perfect for Auger and Screw Pile applications, the Auger Torque Alignment

 Monitor is the essential tool for ensuring your application is precise and quick.Not restricted to parent machine size, the Alignment Monitor is easy to install. With universal mounting of both the alignment sensor and user display, the sensor is fixed to the top of your existing earth drill. The bright colour display is mounted inside the operators cab in a convenient location. Plug the power lead into the 12/24V power socket, and you're good to go.

The Alignment Monitor has 4 sensitivity settings from 1 to $5^{\circ}$ increments, allowing you to adjust to suit the application.

Now that the operator can see the alignment in all directions, there is no need for additional operatives. Perfectly aligned installations are now a one man operation.

## FEATURES

- Plug and play capability
- Alignment display easily installed in operator cab
- A compact, bright colour interface
- Alignment sensor fits to your existing earth drill
- Sensitivity adjustment to suit the application
- IP54 rated - suitable for use in all weathers
- $12-24 \mathrm{~V}$ operating range
- One man operation
